

Carbon Reduction Plan

Supplier name: LINET Uk

Publication date: 04-10-2024

Commitment to achieving Net Zero

LINET uk is committed to achieving Net Zero emissions by 2030.

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:

We aim to reduce our emissions by 10% per year, on that basis the projection would be:

Year	MTco2e Target	MTco2e Actual
2021	3088	3088
2022	2779	473
2023	2501	459
2024	2251	
2025	2026	
2026	1823	
2027	1641	
2028	1476	
2029	1329	
2030	1076	

At each Fleet change we will review the emissions limit imposed in the company vehicle policy.

As part of our continual improvement projects and environmental objectives we will review any available improvements given changes in regulation, legislation and technology.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021

Additional Details relating to the Baseline Emissions calculations.

This is the initial baseline data captured for calendar year 2021. LINET uk have an active fleet which forms a large part of the scope 1 emissions. Scope 3 consists of, Upstream Transport and distribution, waste generated in operations, Business travel and employee commuting. Upstream transport and distribution accounts for 96% of our Tco2E.

Baseline year emissions:

EMISSIONS	TOTAL (tCO₂e)
Scope 1	531
Scope 2	26
Scope 3 (Included Sources)	2531
Total Emissions	3088

Current Emissions Reporting

Reporting Year: 2022	
The data for 2022 and 2023 will be achieved in January 2024 and will be published by April 2024. There Will be a large drop in scope 3 emissions as we review supplier responsibility for upstream transport and distribution.	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	425
Scope 2	24
Scope 3 (Included Sources)	24
Total Emissions	473

Current Emissions Reporting

Reporting Year: 2023	
The data for 2022 and 2023 will be achieved in January 2024 and will be published by April 2024. There Will be a large drop in scope 3 emissions as we review supplier responsibility for upstream transport and distribution.	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	418
Scope 2	21
Scope 3 (Included Sources)	20
Total Emissions	459

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

Since the inception of the Net Zero project LINET uk have had a renewal of our company vehicles and have imposed an emissions limit of 150g/km. The next review will be in 2026 where we will review what the guidelines are at that stage and with the improvements in technology set a new emissions limit.

We use a broker for our energy who review our energy use and put us with the most appropriate supplier, we will now include the purchasing of green energy as a factor in the selection.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
